RF Solutions Guide

Souriau RF connectors can be designed to be one level of customization from standard or completely engineered to meet your performance and custom mounting needs. Souriau specializes in designing high performance products that have the following characteristics:

- ★ Hybrid interfaces
- ★ Extensive qualification testing
- ★ Adverse environment operation
- ★ Altitude moisture resistance
- ★ Surface Mount
- ★ Custom mounting
- ★ High performance
- ★ High density
- ★ Blind mating
- ★ Specialized cable connectors
- ★ Semi-rigid cable connectors
- ★ High power requirements
- ★ Compliant Pins

Souriau custom RF connectors are based on the following standard interfaces:

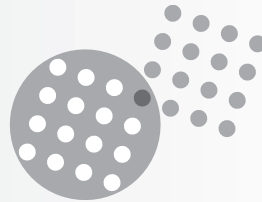

RF Solutions Guide

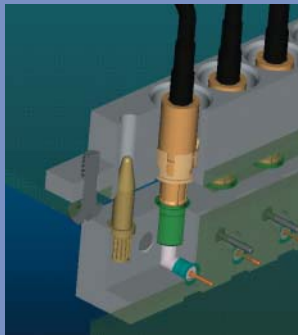

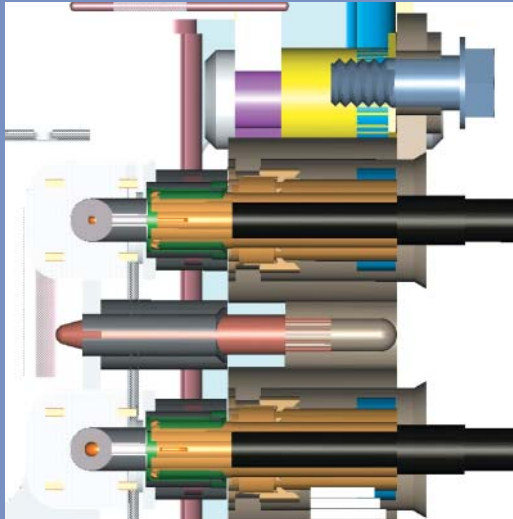

- ★ ISO 9000/9001 and D19000 certified
- ★ Vertically integrated manufacturing capabilities
- ★ CNC Machining
 - Conventional
 - Swiss
- ★ Injection molding
- ★ Complete assembly
- ★ Prototyping
- ★ Certified test lab
- ★ Customized engineered solutions
- ★ High frequency performance
 - Up to 27 GHz
- ★ Hermetically sealed options
- ★ Standard interfaces
- ★ Characterized cord sets
- ★ Cable, board and panel mount configurations available

ENGINEERING CAPABILITIES

Let our expert engineering staff design a connector system that meets your system needs. We utilize ProEngineer software and can take your system file and import a value added, engineered solution for analysis of our solution in your system file!

Our design team can create a customized solution to fit your specific performance requirements.
